

Information Technology

Information Technology is now the Integral part of companies' life. There are unique regulatory compliance within each jurisdiction and distinct reporting obligations. Besides, so much data is placed in the electronic format by each company/individual that tailor-made agreement is essential for each transaction to avoid various potential risk. Information technology lawyers are engaged into transaction-based legal services involving drafting and negotiating agreements. Due to increase of cyber-crime and hacking with help of computer or mobile phone involving money and also infringement of privacy, confidentiality and other rights and also imposition of penalty for infringement by data controller etc., Information Technology lawyers also counsel clients on regulatory issues involving information technology, data security, and domestic and international privacy regulations, directives, and standards. The legal services are in demand for filing and defending cases filed in cyber tribunal located in Dhaka Judge Court and Cyber Appellate Tribunal.

Mohammed Forrukh Rahman
